

Nutrition and Healthy Eating Games

Kids as young as two are using technology as a way of learning through play, apps like **Clever Kid Yum Yum** is aimed for 2-4 year olds and aims to teach them about the effects of early nutrition. Players select healthy or unhealthy foods to feed the hungry yum yum monster and see the results of their choices, making the monster happy and healthy or sad with a tummy ache.

Another popular app aimed for younger children is **Awesome Eats**, where kids learn about fruit, veggies and related health facts as they progress through the game. The app keeps nutrition education fun and even enjoyable for adults to play.

ABOUT SIYANA

Siyana provides next-generation data, analytics, and decision support capabilities catered for massive, sustained improvements in healthcare and education outcomes. We are the leaders in a new era of advanced predictive analytics for with a suite of machine learning-driven solutions, decades of outcomes improvement expertise, and an unparalleled ability to integrate data from across the healthcare ecosystem. Our BIG data approach and know-how of next-generation data warehouse and application development methodologies helps improve quality, add efficiency and lower costs for organizations ranging from the largest US health system to forward-thinking physician practices. Our technology and professional services can help you keep patients engaged and healthy in their homes, communities, and workplaces, and we can help you optimize care delivery to those patients when it becomes necessary. We are grateful to be recognized by Modern Healthcare and a host of others as a Best Place to Work in technology and healthcare.
